

Note: I sent this before June 2nd. Your contempt of the opinions of US citizens is obvious.

The continued consolidation of media corporations are endangering our democracy. Independent voices are being drowned out by large conglomerates, many of which have similar interests and multiple conflicts of interest. Our news is becoming homogenized. Our media was once the best in the world. Now despite more resources and money, the quality of the information the public receives has been reduced to infotainment. Hard questions are not asked because of the incestuous relationships these large media giants hold. Consolidation will only solidify this downward slide of the media. I hope you will take this into consideration on June 2, you are the citizens only hope for stopping this trend. Thank you,

William Simpson
